Ontario and Western to Rebuild Shops at

Middletown. MIDDLETOWN. N. Y., March 25 .- Ontario and Western General Manager J. E. Childs and other officials will meet in this city to-morrow and decide on plans for the rebuilding of the car shops destroyed by fire in this city last 161 163% 161 163% Tuesday, at a loss of \$60,000, on a larger scale. Residents of Walton, N. Y., met on the day of the fire and offered \$25,000 and all necesof the fire and offered \$25,000 and all necessary land and water for the company to remove its plant there, but this action on the part of the officials destroys any chance now of the shops being removed from Middletown, which had been a source of considerable worry to the local Board of Trade. Insurance policies aggregating \$31,000 have been paid to the Ontario and Western, which, it is understood, have generously agreed to reimburse employees for losses in tools amounting to \$3,500.

Court Calendars This Day.

Leadville, upon the report of a strike of extremely rich gold ore on Hayden's Ranch, fif-teen miles south of Leadville. In the stage days Hayden kept a station and incidentally looked for silver ore. About a week ago an ore hauler walking past the abandoned dump of the prospect worked in the early days by Hayden picked up some ore and had it assayed. The ore ran from 13 to 44 ounces gold to the ton. When the report reached Leadville there was an immediate stampede and fifty locations were made. The vein from which this ore came was traced eighty-five feet. To-day 100

men are on the ground looking for indications. The new discovery is only a mile away from the railroad track. Colorado City has pledged itself to give fortyfive acres of ground for the location of a chlorination plant to be erected in connection with the Colorado-Philadelphia Reduction Works. The company has not definitely decided whether it shall be located at Colorado City or Florence. The zine process establishment at Canyon City is to be enlarged to a capacity of

400 tons per day. The Calliope Mine of Ouray has been sold on bond and lease to a Chicago company for \$300 .-000. The terms of sale require the expenditure of \$30,000, and the sinking of the working shaft to a depth of 800 feet. The purchasers also agree to extend the development work total of 2,000 feet. This mine has been a steady producer for ten years, the ore being free mill-

The Victoria group of claims at Frisco below Breekenridge has been sold to a St. Louis company. The property has been worked for several years and ore milling as high as \$400 to

the car has been obtained. About five carloads of high grade ore are ready for shipment from the new camp of Russell in the Sierra Blanca district. Grayback Mountain, the scene of the recent discoveries, lies about ten miles northeast of Sierra Blanca peak. In the Hidden Treasure mine a band of gold is found lying on the hanging wall of a small vein and this streak is fabulously rich. The vein shows excellent average assays. The Goldbug Claim No. 2 has about 300 tons of ore for shipment when the roads are open. There are five or six other promising claims with some ore in sight. This district lies on the Baca Grant which recently passed into the

hands of a Philadelphia company. A new contract has been let for driving 500 feet more on the Iron Mask Mine tunnel at Red Cliff. This will open up a very large mineral territory in a district where millions have been produced in the past through shafts, and will materially reduce the cost of mining in | that neighborhood. It will also determine

the value of deer mining.

Leadville has developed a home market for zinc ores. The ore is first concentrated and then shipped to zine smelters. The experiment of transporting zinc ores to Europe has not proved successful because of the advance of the price of zine in this country. The tonnage from the Leadville district for February

averaged 2,500 tons per day. A contract has been signed for unwatering the old Caribou mine in Boulder county, once the greatest producer of silver in the State The mine is owned by R. G. Dun of New York. but has not been worked for twenty years.

COLORADO SPRINGS, Col., March 22 - Cripple Creek March dividends announced to-day are as follows: Stratton's Independence. \$488,000, Portland \$60,000, Amazon \$30,000, Elkton \$33,750, Consolidated Gold Mines \$10,000, Gold Coin \$20,000, Golden Cycle \$10,000, Independence, T. & M., \$12,500, Isabella \$07,500, Modoc \$10,000, Lillie \$11,250, Raven \$10,000, Strong \$25,000, total. \$743.

The week's deals include the sale of the Ocean View claim on Battle Mountain to the Modoe Company for \$37,000 cash. A twenty-ton shipment from Mary Cashen mine netted \$59 a ton. The Findley has received \$100 a ton on thirty tons, the Home Traction \$100 a ton on twenty-five tons and the Acacia \$80 a ton on fifty-four tons. Strikes during the past two weeks have been

Strikes during the past two weeks have been made in the Atlas, Findley, Delmonico, Mabel M. and the Moon-Anchor properties. The Moon-Anchor has uncovered a three-foot vein as-aying \$30 a ton. The Atlas has a good-sized vein showing fifteen inches of porphyritic quartz with some black manganese, the cross vein value being \$100 a ton. The Alamo and the Jeff Davis, the latter of the Lexington Company, have large veins of pay ore which were uncovered by the grading for the Colorado Springs and Cripple Creek Railroad now building.

the rotten lee of Portage Lake about four weeks from to-day.

The Phoenix Company is negotiating for 120 acres of land adjuining the mine which carries extensions of mineral bodies of value.

The Victoria has ordered a 20-drill air com-

Alaska.

About forty steamers have wintered on the upper Yukon, where they have found harbors of safety. An early spring is evident and it is anticipated a break-up will occur this season in April, affording clear navigation from Dawson to the mouth of the river. These steamers can accommodate from 6,000 to 8,000 men, and it is stated that all of them will be crowded to their full capacity.

to their full capacity.

LAKE REGION IRON MINES. LAKE REGION IRON MINES.

DULUTH, Minn., March 22.—Mines on the Vermillion range of this State will ship more ore this year than ever before. The output is estimated at 1,000,000 tons. Of this the Carnegie Company will ship 700,000 tons and the Federal Steel interests the rest. All but 400,000 tons of the total of the range will come from mines at the village of Ely. There the Carnegie Company is spending a million dollars in sinking new shafts, one each at its Savoy, Sibley and Pioneer mines. The latter will be the first of its kind in the world. The shaft frames will be old steel rails bent into shape and strengthened with steel angles and the walls of the shaft will be strengthened with worn-out wire ropes, discarded from holsting drums, Ac. These will be formed into a network and held in place by the rail frames. So far about fifty feet of this shaft has been sunk. It will be 750 feet deep. It will be a three-compartment shaft and will handle, 30,000 tons a month. Ore at the Pioneer is handled by electric motors, both underground and on surface.

and on surface.

Hundreds of unskilled Italian laborers are coming to the mining towns of Minnesots, where they are employed at surface mine labor at about \$2.2 a day. Such has been the increase of wages that the cost of stripping earth at these mines has been increased to 45 cents a vard.

The fifth new mine of the Mesaba range for this winter is now being opened at Hibbing by Dessau & Mediregor, who have ordered machinery and will sink a shaft. chinery and will sink a shaft.

A third working shaft is now being sunk at Commodore mine, and a pumping plant to hoist 1,500 gallons a minute has been ordered.

The largest pumping plant at any iron mine in the world is to be shipped from the manufacturers' works to the Penoiscot mine on April I. It is designed to raise 7,000 gallons per minute against a head of 310 feet. It is expected to save 50 per cent. of the present cost of pumping.

per minute against a head of 310 feet. It is expected to save 50 per cent. of the present cost of pumping.

A second \$25,000 ore crusher will be installed at the Winthrop mine, Marquette range, as soon as the first is in operation. The two will handle 3,500 tons of ore daily.

The Carnegie Company has found an immense deposit of ore at its Hartford mine, abandoned by the former owners years ago, and is sinking a shaft 900 feet deep. The Michigamme is also found to be a very large mine. It had been abandoned and was idle for many years till the present owners took possession last fall. Mining is beginning there and three shafts will be worked.

Charles Kirenhoff of New York and Dwight E. Woodbridge of Duluth have collected specimens of iron ores of the entire Lake Superior region for the French Exposition, and have forwarded them under Government direction. They embrace fifty specimens covering all leading grades of both hard and sortores of the lake country. Many photographs have been sent also.

NORTHWEST MINES.

NORTHWEST MINES.

PORT ARTHUR, Ont., March 22.—Work has been going on all winter at some zine properties eat of here, on the north shore of Lake Superior. It is stated that the ore runs from 40 to 55 per cent, bure, while that of the Joplin region is from 6 to 10 per cent, and is concentrated six to ten times to get the purity of the rough ore here. The Zenith mine is shipping mineral to Brussels and Hamilton, Another property near here is under bond to a New York company. It is said to be rich,

The Pritchard Harbor Copper Company has been working all winter on its location at the foot of Black Bay, ear Silver Islet. Sinking and drifting have exposed thousands of tons of copper. NORTHWEST MINES.

good mineral, carrying a fair percentage of copper.

Active search has been going on for the main vein of Silver Islet, of which the fabulously rich mine on the islet is the exposure. Most of this work is on lands owned by the Ontario Mineral Lands Company, but now efforts are directed to other lands, and it is rumored that the vein is found.

The Swede Boy mine, on Seine River, has become a producer of bullion, and the first brick was sent to Duluth last week. The mine has a two-stamp steam mill, and the rock is returning a value of about \$12 to the ton.

\$10,000, Independence, T. & M., \$12,500, Isabella \$67,500, Modoe \$10,000, Lillie \$11,250. Raven \$10,000, Strong \$25,000, total, \$743. One other companies yet to be heard from may increase the amount to \$850,000, the largest record of any month excepting December, 1800. The total dividends paid by these companies, which do not include about one-third of the list is \$8,344,320 57.

The Isabella company is still inactive except in development work. The eleventh level, at 800 feet, is expected to encounter soon the benanza vein, returns from which in the two levels above have established world records in car lot shipments. The smelters and mills have advanced charges 20 per cent, while allowing mine owners but \$10 an ounce instead of \$20 as heretofore. The dividend policy of a several large companies compels them to maintain active output; hence the Isabella, among the great mines not owning smelters of their own, can afford to curtail the output.

The week's deals include the sale of the SOUTH DAKOTA.

WASHINGTON. SEATTLE. March 10.—In Mount Stewart district, Kittilas county, the Hawkins group of copper claims has been bonded to Fastern capitalists for \$7,000, and first payment under the bond was made last week. This is one of the oldest mines in central Washington, but has been neglected because of poor transportation facilities. the Grand View group in the same district owned by Spokane people, shows some remarkably rich copper ore, some samples of pure copper weighing 100 bounds, being found. This native metal is distributed through the vein matter. The average assay of the vein which is twelve feet wide is from 12 to 20 per cent, copper. Mono-Anchor has unexpered a three-foot vein as-aying \$30 a ton. The Atlas has a good-sized vein showing fifteen inches of perphyritic quartz with some black manganese, the cross vein value being \$100 a ton. The Atlas has a good-sized vein which is twelve leet wide is from 12 to 20 to you have been black manganese, the cross vein value being \$100 a ton. The Atlas has a good-sized vein which is twelve leet wide is from 12 to 20 ton and the Jeff Davis, the latter of the Lexington Company, have large veins of pay ore wind manganese, the cross vein value being \$100 a ton. The Jersinger group is also making a good and the Jeff Davis, the latter of the Lexington Company, have large veins of pay ore wind manganese, the cross vein value being \$100 at ton. The Jersinger group is also making a good the weight of the lexington of the Colorado Springs of the Colorado Spr

assays in gold and copper from \$18 to \$80.

ARIZONA.

TUCSON, March 16.—From all over Arizona come reports of big strikes of ore. For some time rumors of an unfavorable nature have been coming in from the Heavetta mimes near this city, but all fears have been dispeled by the discovery of a nuch body of native copper. The present management concluded to extend the tunnel, and a tergoing in less than thirty feet found the new body of ore. There is now no doubt as to the permanency of the camp.

The gold and copper finds in the Santa Catalina Mountains, about thirty-five miles afreely north from Tueson, are developing into good mimes. A new road is being constructed from this city direct to the mines. These properties are on the same side of the mountain range as the Mammoth-Collins group of gold mines. No copper claims of any introduce have been worked here, but gold has been taken out in paying quantities for many years.

A evanide plant will soon be installed on the

contains gold of from \$125 to \$150 per ton. There is a small ditch ten miles long, dug many years ago for conveying water from Crooked River. This will be enlarged and the company will put on giants. Work will commence as soon as supplies can be taken over the road.

A short distance below Gold Hill, on Crooked River, a companythas located 1,000 acres of ground, on which a drodge will very likely be placed during the summer.

The placer mining season has opened a month earlier than usual and the claims will all be working within a week. Water is now through many of the long ditches.

Two men from Miller Mountain, who came in on showshoes a few days ago, say that the winter's development work on the Jefferson has proved it to be a free gold mine of great promise. The vein is from fifteen to twenty feet wide of ore that will mill from \$10 to \$15 per ton. Machinery will be shipped in as soon as the wagon road is in condition.

MONTANA. HELENA, March 18.-The annual report the Boston & Moulana Company for the year 18:6) has just been made public. The gross re-cepts from sules of copper, gold and silver were \$11,257,280, as compared with \$7,448. 600 the previous year, and the net profits \$6,004,849 as compared with \$3,334,643 in 1898. Dividends paid in 1849 were \$5,400,000, against \$2,400,000 the previous year. UTAH.

SALT LAKE, March 19.—In the ore and bullion market the week closed with settlements amounting to \$504,408, as compared with \$308,205 for the previous one.

The week's receipts at the gold sampling rooms of the Consolidated Kansas City Smelting and Reilining Company reached a total of 1.220 pounds of gold dust, worth about \$300,000.

Another strike has been made in the Shoot Another strike has been made in the Shoe-bridge-Bonanza at Silver City. Five feet of ore has been exposed to the 450-foot level. A sample of the ore gave an average of 11 per cent. copper, 20 ounces silver and \$4.00 in gold.

ILLINOIS. Galena, March 19.—The Great Western Mining Company, with Chicago and Eastern capital, has reopened some lead mines on Plum River, which had been abandoned since the late '50s. The mines are four and a half miles southeast of Galena. They have developed some 80 per cent, lead ore in several veins of six to twelve inches, have put in pumping machinery and are preparing for shipment.

CALIFORNIA.

AMATEURS VERSUS VARDON

HOW WILL HARRIMAN AND DOUGLAS FARE AGAINST THE CHAMPIONS

A Lively Interest in the Contest as a Test of American Progress in the Game -- What the Best Ball Score Should Be -Open Tournaments South This Week. There is the liveliest interest manifested

on every side in the match Vardon will play at the Atlantic City Country Club a week from tomorrow against the best ball of Herbert M. Harriman and Findlay S. Douglas. There is every reason that this should be the case, for aside from the chance of the amateurs scoring against Vardon, as John E. Laidlay and Leslie Balfour-Melville did during his Scottish tour last summer, the match will be a grand test of the degree of excellence our players have in a general way attained in the game. The form of the two to oppose Vardon is so well known that the result, taking Vardon as the maximum standard of skill, should furnish almost an exact line as to the relative merits of the amateurs here and abroad. This difference. according to H. J. Tweedie of Chicago, who knows the men and the game on both sides of the ocean, is not so great as many think. After stating in the Western Golfer that he had seen better golf played here last summer than in a

dozen years Tweedie adds: "I think that the tendency has been greatly to exaggerate this difference. Perhaps there is a four-stroke difference between the highest class of British amateurs and our first-class amateurs. It appears to me that golf went ahead much faster here last year than in any previous season since its introduction on this side of the Atlantic. The character of the play all round was much better, and the first-class scores of both amateurs and professionals were wonderfully low."

The coming match will show more on this point, however, than a chapter of opinions.

veins of ax to twelve inches, have put in pumping machinery and are preparing for shipment.

Les ANGELS, March 17.—St. John's quick, sliver me, near Valieu, has been flooded for body of rich, ore, known and unwatered.

President, Prof. W. D. Bancroft: Vice President, Prof. J. H. Tanner; Secretary, C. H. Blood; Treas-urer, C. E. Treman: Governing Board, the above of-ners, C. E. Wycoff and Profs. M. Dennisand and E. W. Huffeut.

Willie Dunn played again yesterday at the Laurence Harbor Country Club, and with the President of the club, William Freeland, as opponent, he made new records for both eighteen and thirty-six holes. In setting out Freeland pushed Dunn so hard that they were all square on the first round, each scoring 41. This aroused Dunn and he made the next nine in 39. He was then 4 up. This fine form was kept up to the end, Dunn winning by Supand 7 to play. He also had the better of the bye holes. The former records were 80 for eighteen holes, made by Vardon in a practice match with President Freeland on Feb. 11, and the thirty-six hole record was 171, made by Vardon when he played the best ball of M. M. Singer, John M. Ward and H. C. Villepigne on Feb. 12. The course is in fine shape and consistent play is easier than it was a month ago. The cards yesterday were:

Gossip of the Ring.

S. N. New York. He quit in the twelfth round in their first match. Dave Sullivan has been matched to box Tim Callahan for six rounds at Philadelphia, on next Jim Corbett is figuring on taking a trip around the world. He will start on his journey after his battle with Jim Jeffries. The twenty-round battle between "Spike" Sullivan and Percy Melntyre, which was to have taken place at the Greenwood A. C. on March 51, has been declared off. Former champion Bob Fitzsimmons is slated to face Jim Daly, Jim Corbett's former sparring partner, in a six round bout at Philadelphia to morrow night, Sports look upon Daly as the easiest kind of a mark for the Cornishman.

Owing to a mishap, George Gardiner of Lowell will be unable to mee: Andy Walsh at the Hercules A. C. to night. In his place Jack Collyer of Far Rockaway has been substituted. The meeting is for twenty age rounds. There will be one preliminary bout
